SUMMARY

LogDNA is an industry leader for log monitoring. Dive into this eBook to see why users love us.

G2 is the world’s largest tech marketplace where businesses can discover, review, and manage the technology they need to reach their potential. With G2, LogDNA users review the product and share their personal experience. They are asked a series of questions that are standardized for all companies in the log monitoring category to get a holistic sense of how easy each product is to implement and use.

LOG MONITORING IMPLEMENTATION

- **Easiest Setup**
  - **WINTER 2022**

- **Fastest Implementation**
  - **WINTER 2022**

- **Most Implementable**
  - **WINTER 2022**

- **Highest User Adoption**
  - **WINTER 2022**
Implementation scores for log monitoring are shown below. The chart highlights some of the factors which contribute to a product’s overall implementation score including how easy a product is to set up, how long it takes to implement, and average user adoption.

“

So easy that I’ve actually started logging! It’s pretty easy to get just about anything to ship logs to LogDNA. Since it’s no hurdle, it’s now trivial to make sure every device or piece of software I use can output to LogDNA. Since I can also have LogDNA export all those logs to an S3 bucket for me, I now have centralized logging with infinite retention.

Phillip S., IT Administrator
